

## FOAM MODULES ADAPTED

- ❑ New range of foam modules specially adapted for disabled adults making gymnastics accessible to all
- ❑ Allows both adults and children to develop self-control
- ❑ Positive impact on self confidence
- ❑ These modules enable various play activities to be set up whilst promoting coordination and sense of balance
- ❑ Products of the Educ'Gym range can also be linked to this range in order to create many different circuits

## COMMON TECHNICAL FEATURES

- ❑ 1000 denier PVC cover, M2 fire classification
- ❑ Anti-slip base

□ **Ref. 0340 - CYLINDER**

- Styrofoam to reduce weight
- Dim. = 200 x 70 cm (LxØ)

□ **Ref. 0341 - STEPS**

- Styrofoam to reduce weight
- Dim. = 114 x 100 x 72 cm (LxWxH)
- Steps height = 24 cm
- 4 carrying handles

□ **Ref. 0342 - RAISED INCLINED SECTION**

- High density foam for strong support
- Dim. = 160 x 100 x 72 cm (LxWxH)
- 4 carrying handles
- Thanks to a central opening (width = 30 cm), this module allows correct positioning of the head during front and rear rotations
- Support foam module in option **Ref. 0345**

❑ **Ref. 0345 - SUPPORT FOAM MODULE**

- Optional, for raised incline section, sold individually
- Recommended quantity: two
- Dim. = 160 x 5 x 66 cm (LxWxH)
- These support foam modules are used to allow smaller users to perform the exercise safely by reducing the width of the passageway's centre slot
- Gives a better support to the shoulders

❑ **Ref. 0343 - SUPPORT**

- High density foam for strong support
- Dim. = 50 x 100 x 50 cm (LxWxH)
- Unit

❑ **Ref. 0344 - SOFT MAT**

- High density foam for a better comfort
- Dim. = 170 x 100 x 10 cm (LxWxH)
- This module fits the raised inclined section **Ref. 0342**
