

LEARNING FOAM BEAMS

- ❑ Allow gymnasts to learn new skills at floor level to build confidence and ease apprehension
- ❑ Ideal for coaches to support new skills at low level
- ❑ Foam composition limits shock by distributing weight
- ❑ Allows gymnasts to become familiar with the sensation and positioning of the standard beam
- ❑ Can be used on many surfaces, both at the gym and at home (exercise floors, landing mats, carpets, tiles...)
- ❑ The Ref. 3665 has hook and loop strips: Several beams can be connected to work on combinations
- ❑ Visual landmark with a central alignment line
- ❑ Comfortable, stable and easy to store

Ref. 3665 – Learning foam beam

Ref. 3667 – « Home » learning foam beam

TECHNICAL CHARACTERISTICS

- ❑ PVC cover
- ❑ Hook and loop strips to associate several beams (Only for Ref. 3665)
- ❑ Central alignment line of 10 cm
- ❑ Non-slip base
- ❑ Density: 180 kg/m³
