Technical Specifications

Composition:

- 1 Gymnastics carpet
- 2 Concertina-folding comfort foam
- 3 Floor
- 4 Springs

Composition:

1/ Gymnastics carpet

Made up of several widths joined together by self-gripping strips. Integral edging in a different color. Perimeter of the carpet finished with whip stitching. Built-in anti-rotation system. Gymnastics area = 12 x 12 m.

2/ Concertina-folding comfort foam

New 56 mm-thick laminated foam comprising three different hardnesses, including an ultra-soft 16-mm comfort layer providing dynamism, stability and comfortable landings. The foam area is made up of concertina-folding mats for quick, easy installation with pre-cut strips around the perimeter providing a perfect finish. Supplied with anti-rotation mechanism.

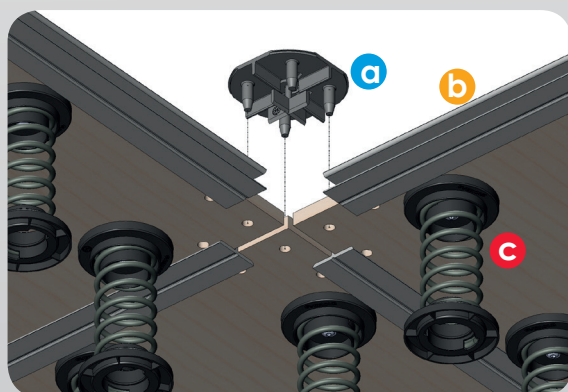

3/ Floor

Special plywood laid on new dynamic springs. The panels are connected together using new fastening sections and new locking plates for optimum consistency. Supplied with anti-rotation mechanism.

4/ Springs

2,709 more flexible springs with a height of 125 mm are strategically positioned on the floor for more consistent rebound.

This increases the deformation range of the spring, enabling the gymnast to gain more rebound.

- a Locking plate
- b Fastening section
- c Springs
